The screenshot shows the Microsoft Power BI desktop application. On the left, the 'Connections' pane lists 'Sample - EU Superstore' (Microsoft Excel) and other sheets like 'Orders', 'People', and 'Returns'. A green arrow points from the 'Orders' sheet to the main workspace. In the center, a large orange box highlights the 'Orders' sheet, which displays a preview of the data with columns such as Row ID, Order ID, Order Date, Ship Date, Ship Mode, Customer ID, Customer Name, Segment, Postal Code, and City. The data includes various entries for different customers like Aaron Bergman, Rick Hansen, and Jim Mitchell.

The screenshot displays several overlapping windows. On the left, the 'Connections' pane shows a Microsoft Excel connection named 'Sample - EU Superstore'. Below it, the 'Sheets' pane shows 'Orders' and other sheets. In the center, an 'Add a Connection' dialog is open, listing various cloud services like Alibaba AnalyticDB for MySQL, Alibaba Data Lake Analytics, and Alibaba MaxCompute. To the right, a file browser window shows a list of files in a folder, with one file, 'Export_13-04-2...postalCode.csv', highlighted in orange. At the bottom, a 'Join' dialog is open, showing a list of tables from the 'Orders' data source, including 'Beneficio', 'Categoría', 'Categoría y Subcategoría', 'Ciudad', 'Descuento', and 'Estado'. A green arrow points from the highlighted file in the file browser to the 'Join' dialog.

The screenshot displays a Tableau dashboard titled "Tableau - EmpresasDetails_01". The dashboard features a map of Spain and Portugal with numerous colored dots representing data points. A tooltip is open over a dot in Madrid, showing the postal code (28001) and industrial classification (9). The interface includes various cards for dimensions like "Postal Code" and "Address Region", and measures like "isicV4 Count (Distinct)". On the right, there's a summary table for the postal code dimension and a detailed edit dialog for the tooltip message.

Connect to HockaidoDB - MongoDB

The screenshot shows the Tableau Support website with the following details:

- Header:** PRICING, SIGN IN, magnifying glass icon.
- Navigation:** + a b | e a u, Products, Solutions, Learning, Community, **Support**, About, COVID-19.
- Section:** SUPPORT
- Title:** Driver Download
- Text:** Find the driver for your database so that you can connect Tableau to your data.
- Text:** To get the right driver, you might need to know your Tableau product version. In Tableau Desktop, select **Help > About Tableau**. In Tableau Server, click the information icon ⓘ and select **About Tableau Server**.
- Text:** For Tableau Bridge, use the same drivers as Tableau Desktop.
- Text:** **Important:** After Tableau 10.5, we are changing the way we number new versions of our software. The version following 10.5 is 2018.1. The next version will be 2018.2, and so on. For more information, see the [Changing our version numbering for new software releases](#) blog post.
- Filter Options:** Data Source (MongoDB BI Connector), Operating System (Mac), Bit Version (64-bit).

The MongoDB Connector for Business Intelligence lets you use MongoDB as a data source for SQL-based analytics and data visualization tools like Tableau. Seamlessly create the Tableau visualizations and dashboards that will help you extract the insights and hidden value in your multi-structured data.

The MongoDB Connector for BI is part of MongoDB Enterprise Advanced. Get started by downloading the [MongoDB Connector for BI](#) from here. You can review our [evaluation agreement](#) here.

Connecting From Tableau

Here's a brief tutorial on how to connect to the BI Connector from Tableau with or without MongoDB authentication enabled.

```
/Users/soniacelis/mongodb-macos-x86_64-4.2.0/bin  
mongodb+srv://User:Pass@clusterhokkaido-quamv.gcp.mongodb.net/test
```

```
mongoexport --uri="mongodb://mongodb0.example.com:27017/reporting" --collection=events --  
out=events.json [additional options]
```
