The screenshot shows the Tableau Data Source interface. On the left, under 'Connections', there is a 'Data' entry for 'Microsoft Excel'. Below it, the 'Sheets' section lists 'Countries', 'Data' (which is selected), and 'Indicators'. A checkbox for 'Use Data Interpreter' is present with a note about its purpose. The main area is titled 'Data' and contains the text 'Microsoft Excel file...'. An orange box highlights the 'Data' sheet in the list and the 'Data' folder icon in the main area. A green arrow points from the 'Data' sheet in the list to the 'Data' folder icon. A red annotation 'Arrastrar y Soltar' with a yellow arrow is positioned over the 'Data' folder icon, and the text 'Drag sheets here' is written above it.

The screenshot shows a Tableau dashboard titled "Por código postal - Región" displaying a map of Spain and Portugal. Data points are represented as colored circles of varying sizes, indicating the count of distinct ISIC codes. A specific point in Madrid is highlighted with a tooltip showing "Postal Code: 28001" and "ISIndustrial Clasification: 9". A green arrow points from the "Edit sizes..." option in the context menu of this point to the "Edit sizes..." button in the bottom right corner of the Tableau interface. Another green arrow points from the "Edit sizes..." button to the "Edit Tooltip" dialog box, which is open and displays the message "5.".

The MongoDB Connector for Business Intelligence lets you use MongoDB as a data source for SQL-based analytics and data visualization tools like Tableau. Seamlessly create the Tableau visualizations and dashboards that will help you extract the insights and hidden value in your multi-structured data.

The MongoDB Connector for BI is part of MongoDB Enterprise Advanced. Get started by downloading the [MongoDB Connector for BI](#) from here. You can review our [evaluation agreement](#) here.

Connecting From Tableau

Here's a brief tutorial on how to connect to the BI Connector from Tableau with or without MongoDB authentication enabled.
